SKILLS

Technical Skills

- Backend Development: Node.js, Express.js, RESTful APIs, MongoDB, SQL
- Web & App Development: JavaScript, React Native, HTML, CSS
- Database Management: MongoDB, MySQL
- Cyber Security: Network Security, Vulnerability Assessment, System Hardening, Ethical Hacking
- Networking: Network Configuration, Troubleshooting, Infrastructure Management
- Tools & Platforms: Git, Postman, VS Code, Wireshark

Soft Skills

- Strong problem-solving and analytical abilities
- Effective communication and team collaboration
- Project planning and time management
- Quick learner with a growth mindset
- Adaptable and resilient under pressure
- Entrepreneurial thinking and initiative-driven

LANGUAGES

- English (Fluent)
- Bengali (Fluent)
- Hindi (Fluent)

PROFILE

A dedicated and detail-oriented B.Sc (Hons.) Advanced Networking and Cyber Security student with a strong foundation in network infrastructure, system security, and application development. Possessing one year of professional experience at Acadspace Technologies, contributing to enterprise-level network and security solutions. Additionally, worked on multiple freelance and personal projects including VibeOnTop.com, Jodiace, and Dattatreya, gaining practical expertise in full-stack development, system architecture, and security management. Committed to continuous learning and delivering innovative, efficient, and secure technology solutions in dynamic environments.

WORK EXPERIENCE

Freelance Developer

PRESENT

Self-employed

- Designed, developed, and secured web and mobile applications for multiple personal and freelance projects.

Key projects include:

- VibeOnTop.com — Full-stack development and system security configuration for a lifestyle platform.
- Jodiace — Led backend integration, application security checks, and deployment.
- Dattatreya.com — Conceptualized and developed a platform connecting entrepreneurs with investors; responsible for system architecture, security protocols, and product management.
- Provided end-to-end project management, from requirement gathering to deployment and post-launch optimization.

Acadspace Technologies

2024 - 2025

Tech Support

- Developed and maintained backend systems and APIs for enterprise applications.
- Worked with server-side technologies to manage database integrations, authentication modules, and RESTful services.
- Contributed to optimizing system performance, ensuring secure data transactions and robust server operations.
- Collaborated with frontend teams and system administrators to integrate backend functionalities with user-facing applications.

EDUCATION

Bachelor of Science (Honours) in Advanced Networking and Cyber Security
Brainware University

2022-2025
